Breezlets

Zeppelin crews have evidently not lost faith in the humanity of the British; they wireless for aid quite as if among friends.

"No blame attaches to Germany." A nation that rejoices in a Louisiana massacre would scarcely feel that the sinking of a channel ferry boat is at all blameworthy.

A jolt from one man, may be a jolt for another.

For instance, witness the woman in Port Arthur who got \$75,000 for jilt. Some jolt for the man in the case.

The amateur gardener is just aching to get at his little patch of land.

And in a short time he will be aching because he has given at his acts more or less by his desire to please the majority of the voters.

An English newspaper says that President Wilson will go down into history as a man of NOTE.

A descendant of William Penn, the Quaker, wanted exemption from military service in England because of his ancestor's peace principles. But the sword proved mightier.

Of course "a duck of a hat" would be the proper thing for a wet day.

Washington authorities appear to think that the skeleton army can lick the Mexicans with one arm tied behind the back—and the other cut off.

If Pancho Villa was strictly up-to-date he'd get out of his present muddle by a disavowal of that Columbus raid.

A German professor now announces that he has discovered certain affinities between Teuton and Turk.

The rest of us saw this some time ago, but it is pleasant to have it confessed.

"Wilson to treat with Carranza" says a heading.

Now, if it were with Bryan, of course it would be grape juice.

Wilson's last note seems to have knocked Wilhelm into the middle of next week.

Where will he land when Uncle Sam's boot hits him?

An American's Opinion

ON THE PRESIDENT'S MOTIVES

It is probably not doing President Wilson or his close political advisers both in and out of congress an injustice to say that many of his acts and much of his talk just now is regulated by an appreciation of the fact that next November is not far away and that in all probability he will be the candidate of his party for re-election at the presidential election to be held then.

If a Republican were in his place in the White House now and were bending all his energies to getting a re-nomination as the presidential candidate of his party he would also probably keep his eye on the coming November. That is to say, it is a natural characteristic of any official under our form of government to guide his acts more or less by his desire to please the majority of the voters.

So that one need not be a partisan in an offensive way to assert that President Wilson is a different official he was a year ago and is acting in a different manner with every national and international question than he would have acted toward it a year ago.

This is not to accuse President Wilson of chicanery or double dealing or of unpatriotic motives. It is simply stating a condition and not a theory that should guide all who desire to arrive at just an estimate of what amount of reliance to place on various statements and interviews that are originating close to the White House and that will come from now on.—Lawrence (Mass.) Telegram.

Enlisting Boys

SHOULD NOT BE DONE

Speaking on the above question in the house of commons the other day, Sir Robert Borden said

he had always understood that it was the policy of the department not to enlist boys under eighteen. It that was not the policy, he thought it should be. Where complaint was made about boys enlisted who were under age they should be discharged. He would look into this case.

We take it that Carranza is saying to Uncle Sam "Here's your hat. Come again when invited.

Chinook Breezes

Not much grain moving yet.

May 1st next Monday.

Mother's Day second Sunday in May.

Easter-tide was spent quietly in Chinook, the weather being stormy, perhaps kept many people in doors.

The next meeting of the Chinook Women's Institute will be held in Arm's Hall, on Saturday, May 6th.

General Regret, If True

The startling news was going the rounds this week that Miss Estella Fish had died from appendicitis. Up to the time of going to press this report has neither been confirmed or contradicted.

Renews Old Acquaintances

Miss Lillian Irvine on the teaching staff of the Drumheller school, and formerly in charge of the junior room here, spent the Easter holidays in Chinook, the guest of Mrs. A. Nicholson. Miss Irvine's many friends were pleased to see her.

Ladies, Your Attention, Please

There will be a meeting of the ladies of town and vicinity at the home of Mrs. I. Denman, next Friday afternoon, April 28th, at 3 o'clock, to talk over and make arrangements for the inauguration of a branch of the Victorian Order of Nurses for Chinook. All ladies are cordially invited.

An Indiarubber Man

An indiarubber man gave a side show in the pool room on Saturday evening. He could twist himself and limbs in any shape, and it is said he could tie himself in a knot, but this may knot be true. If reports can be relied upon, he certainly went through some wonderful contortions.

The Editor in Prophetic Mood

Cyril White of Riddellvale, who went with the first contingent in the Princess Pats, and has been at the front for the past year or more, has just been recommended for a lieutenancy in the Princess Pats. The appointment will be gazetted in due course. Congratulations. The editor of this great family journal made the prediction that Cyril, when leaving for the front, would win his commission as a lieutenant—and perhaps something higher.

Rural Phones

CHINOOK BOARD OF TRADE MAKING ENQUIRIES

Copy of letter received from the agent of the Alberta Farmers Co-operative Elevator Co., Mr. J. W. Bishop of Redwillow, Alta.: Chinook Board of Trade, Dear Sirs,—Replying to yours of the 20th of last month, re our telephone system, will say in reply the method we are using is based at \$75.00 per share per mile per phone. The same is proving most satisfactory. Independent phones we rent at \$1.00 per month, and shareholders pay 25 cents per month maintenance fee, this is based on one phone per mile, single-wire.

For further information please write Mr. Henry Lyster, Redwillow, Alta.

Yours truly,

J. W. BISHOP

fingers.

Chinook Advance

A Double Wedding

As a result of the new ruling laid down by the department of education recently, all school teachers are now required to take the oath of allegiance. This is a precautionary measure and is also calculated to impress on our teachers of the province the necessity of imparting lessons in loyalty to the British Empire, especially in this time of distress.

Chinook Breezes

THE LAKES ARE NOW OPEN—SEE THE GRAIN MOVE NOW.

Farmers are rushing busy on the land now.

The amateur gardener is getting his work in.

The dance on Tuesday drew quite a crowd.

A Catholic service will be held at residence of Mr. I. W. Denman, Saturday next, April 29th, at 10 a.m. Rev. Father Dargen.

Mr. C. E. Woodruff of Chilliwack, B.C., will spend the summer in Chinook with his son, Mr. R. S. Woodruff, the new hardware man.

She Can be Gentle—and Rough, too

Gentle spring can be gentle indeed when in the mood. May she often be in the mood.

Canadian Band in Tune

The full sloughs around here are the Canadian bands—the frogs—paradise these days and nights.

Changes Her Position

Mrs. Whelan, who has charge of the post office here during the past four months, has resigned to take a position in the Chinook branch of the Union Bank. Miss Crozier, of Youngstown, succeeds Mrs. Whelan at the post office.

Shall Watch Their Careers With Interest

Capt. C. W. Rideout of the 175th O. S. Batt., is in town this week, on a recruiting campaign for the 175th. One of his first recruits was Lorne Benthine. We shall be sorry to lose Lorne from Chinook, but he leaves for a good cause. We shall watch his career with interest, as also all the other Chinook boys, and trust that they will be among the fortunate ones who may be permitted to join in the march to Berlin.

Speaking in the House of Commons this week on the question of shipping the grain, Sir George Foster said, that the shipping of all the grain during the winter months was a physical impossibility because it would have required ten trains a day for three hundred days to do the work.

Over one hundred bombs were dropped by the Zeppelin dirigible balloons in their raid over England Tuesday night. The announcement was made by the official press bureau. There were no casualties.

Chinook School

PRINCIPAL MARCY RESIGNS

Mr. N. F. Marcy has resigned the principalship of the Chinook school, having decided to go on his land and be a farmer for a time. Great changes have taken place since Mr. Marcy became principal of the school. In 1913 when Mr. Marcy took charge there were in attendance about 9 pupils, the school then being on the line, that is, according to population, so each year has seen the number of children in attendance at school greatly increased, and to-day the total on the roll is 100, with a graded school and more teachers. Chinook is now a consolidated school with three teachers. Mr. Marcy has been one of the principal factors in the consolidation scheme, and although at first it met with defeat, it has now been brought to a successful issue. Mr. Marcy can take a large share of credit for its final success. During the present year a commodious new school is to be built, but more about this later. Mr. Marcy leaves the school in good shape for his successor.

Mr. Tinkerton of Calgary has been engaged by the Board to succeed Mr. Marcy. The new principal, who comes highly recommended, has had considerable experience in high school work, having been principal of a high school for four years. Mr. and Mrs. Tinkerton are expected in Chinook the latter part of this week, the principal taking up his duties on Monday next, May 1st.

Speaking in the house of commons this week on the question of shipping the grain, Sir George Foster said, that the shipping of all the grain during the winter months was a physical impossibility because it would have required ten trains a day for three hundred days to do the work.

Over one hundred bombs were dropped by the Zeppelin dirigible balloons in their raid over England Tuesday night. The announcement was made by the official press bureau. There were no casualties.

SYNOPSIS OF CANADIAN NORTH- WEST TERRITORIES

The sole head of a family, or any male over 18 years of age, may homestead any land available. Dominion land in Manitoba, Saskatchewan or Alberta. Application must appear in person at the Dominion Land Agency or Sub-Agency for the District. Entry by proxy may be made at any Sub-Agency or Agency (but not Sub-Agency) on certain conditions.

Twenty-Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within thirty miles of his homestead on family or other land, under certain conditions. A habitable house is required, except where residence is performed in the vicinity.

In certain districts a homesteader is good standing, may pre-empt a quarter-section alongside his homestead. Price \$100 per acre.

Deeds are issued in each of six years after obtaining homestead patent; also to note extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may then purchase homestead in certain districts. Price \$50 per acre. Duties—Must reside six months in each of three years, cultivate 50 acres and erect a house worth \$300.

The area of cultivation is subject to reduction in case of rough scrubby or stony land. Live stock may be substituted for cultivation under certain conditions.

COLLHOLME KOLUM

SOME CRAKERJACKS

Wheat seedling is about finished

Collholme is seriously thinking of organizing a beef ring during summer months.

LOOKS PROMISING, SURE

It looks as though some of our bachelors are seriously considering matrimony, as a nice bunch of Orphingtons are parading around their houses.

AND HE'S A GOOD ONE

We are pleased that our live stock Commissioner has fulfilled his pledge, and has sent our Shorthorn Association a fine pure bred bull.

GRATITUDE

Mr. Lou M. has just finished seeding. One piece particularly has been seeded four times without ploughing. It reminds us of the scripture—kernel of wheat is much larger than mustard seed to have faith in it.

LOVING THY NEIGHBOR

We are pleased to notice that the gentleman living opposite the intended post office, has erected a new blacksmith shop. Now that he has hired permanent help he will have more time at leisure to help his neighbors out, and so fulfil part of one of the great commandments, "Love thy neighbor as thyself."

COULDN'T RESIST TEMPTATION

While coming from Chinook, a man passing along the new intended postmaster's residence, seeing a fine large dinner pail alongside a pool of water, stopped the team and sneaked off with the part of the kitchen utensils that was so useful in our newly wedded kitchen. The man has since been in the barber's chair, but it seems it didn't happen this man, as Sampson of old lost his strength when shaven.

The meeting of the ladies to consider the question of the Victorian Order of Nurses, to be held at the home of Mrs. Deman on Friday evening, should be at 8 p.m. instead of at 9 p.m. as printed elsewhere.

We regret to learn that Mrs. Deman, sen., is under the doctor's care.

WANT TO SEE SOMETHING.
When hunting go hunting the furs.
Feelings it badly unnerves.
For 'twould save me much pain
To be free of a gouty pain
To shock on my wife's new preserves.

SCENTS THAT AFFECT BREATHING.
The perfume of certain flowers affect the digestion or breathing or cause dizziness and even fainting fits. Vanilla is troublesome to many, so is the white flower of the *Ligustrum japonicum* and the *pitisperma*. The tuberoses, jasmine and lilac are objectionable to some. The *Datura stramonium* makes people know.

This action of flowers is due to the scent and is distinct from the influence of pollen, which produces hay fever.

Joy and Sorrow.
Joy, they say, is a sensation similar to sorrow. It merely hurts along lines that were enjoyed. We go to the theater, after a tony play and are delighted fully and. Some people's greatest joy lies in being sad.

What a remarkably interesting study must humanity be to the scientists of the lower kingdom!

Production and Thrift

To win the war with the decisiveness which will ensure lasting peace, the Empire will require to put forth its full collective power in men and in money. From this viewpoint it is our true policy to augment our financial strength by multiplying our productive exertions and by exercising rigid economy, which reduces to the minimum all expenditures upon luxuries and non-essentials. Only in this way shall we be able to maintain the high standard of living which is the right of every Canadian, to conduct our activities, repair the wastage of the war, and find the funds for its continuation. It cannot be too frequently or too earnestly impressed upon our people that the heaviest burdens of the conflict still lie before us, and that industry and thrift are, for those who remain at home, supreme patriotic duties upon whose faithful fulfilment our success, and consequently our national safety, may ultimately depend. —
SIR THOMAS WHITE, Minister of Finance.

PRODUCE MORE, SAVE MORE.

MAKE LABOUR EFFICIENT.

SAVE MATERIALS FROM WASTE.

SPEND MONEY WISELY.

LET US PRODUCE AND SAVE

The war is now turning a great all of forces and resources into munitions food, money. The call to all is to produce more and more. It may be necessary to work harder. The place of those who enlist must be taken by those at home, men and women, old and young. The more we produce the more we can save. Produce more on the farms and in the gardens. Save more and help to win the war.

LET US NOT WASTE OUR LABOUR

In this war-time all labour should be directly productive or should be used to produce. Money is as efficient as possible. If your labour is on something that can be postponed, put it off till after the war and make your labour tell now. Making war is the first business of all Canadians. Efficiency in labour is as important as efficiency in fighting.

THE GOVERNMENT OF CANADA

THE DEPARTMENT OF AGRICULTURE

3

LET US NOT WASTE MATERIALS

In this war-time the larger portion of salaries and wages is spent on the purchase of hats, food, fuel and clothing. Are any of these things being wasted? \$20.00 a year saved from waste in every home in Canada will more than pay the interest on a war debt of \$900,000,000.

LET US SPEND OUR MONEY WISELY

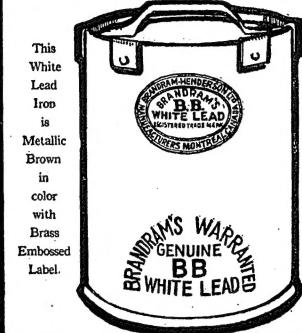

Are you spending your money to the last advantage? What do you think of extravagance in war time? Tens of thousands of Canadians are daily saving money for us at home. Is it not a duty to be careful and thrifty? Canadian soldiers are an important part of the war equipment. Make them tell. Have a War Savings Account. Buy a War Bond.

THE LINGERIE BLOUSE WITH COLOR TOUCHES

IT IS a decided fact that a woman's interest in blouses never wanes. Perhaps this is because designers are ever offering something new. This season a cheerful note has been sounded—that of vivid coloring. The wildest combinations are seen, and yet the result is harmonious.

The blouse made along plain lines is an example of the unusual color combination. The blouse itself is of orange handkerchief linen, while the collar and lower section of the cuffs are of lavender linen. By the way, handkerchief linen is quite a favorite material for lingerie blouses, and it is offered in plain colors, stripes and checks.

Since stripes bid fair to be well-liked this season, it behoves the smartly-dressed woman to include one striped blouse in her wardrobe. A pink-and-white candy stripe, like the one shown, is very stunning. The pique collar and cuffs add to its immaculate pink-and-whiteness.

The white blouse showing green linen piping along the tucks on the front and sleeves would be charming to wear with a green coat suit. The odd use of green linen on the collar adds character to the model. The buttons and buttonholes are merely decorative and are not intended to be useful.

Here you are, girls, if you're looking for a manly type of blouse. The one with the shirt-front effect is just the thing. However, the blue-and-white combination reserves a feminine touch of daintiness. The blue part of the blouse is of marquisette—a material which has been restored to popularity. The tucked section and the collar are of fine white handkerchief linen. White crochet buttons ornament the front pleat and hold down the tucks taken in the sleeve to form a fitted-cuff effect. Hem-stitching has been used to good advantage to trim the blouse.

There has been a revival of hand embroidery on blouses. The application of the hand-work is more artistically applied than heretofore. On the blouse of sheer white lawn eyelets and solid stitches are used to bring out the beauty of the sprays on either side of the front pleat. Old-rose marquisette has been used to trim the collar and cuffs. It also forms a background for the white buttons.

Don't lose sight of the fact that all of these blouses except one feature low collars. This note will be appreciated more highly as the warm weather advances.

• LADY • URSULA'S HUSBAND

— BY —
FLORENCE WARDEN
Ward, Lock & Co., Limited
TORONTO

(Continued)

But this opinion of opinion on the part of the detective roused Lord Eastling to fury. It was with difficulty that he was restrained by his companion from rushing back to the platform to confront the viscount. He had no time to make known to the officials the result of a journey which began to appear to him in the light of a wild goose chase.

Then suddenly, most unexpected, through the flutter of a long, heavy black cloak on a tall, erect female figure, he breathed a sigh of relief which was almost a groan.

It was his sister, Lady Ursula.

Long before he could come up with her, she had got into a closed cab, and Paul Payne had shut himself in with her.

Lord Eastling, now completely reassured, chartered a second cab, and, alighting a good distance from the first, he followed his sister into the cab. The driver, promised him a second if he kept in sight of his destination the faerie in front.

The first cab stopped at a quiet hotel, the choice of which proved that Paul Payne knew his Paris, and avoided the haunts of the casual tourist, both English and American.

By the time the cab had got out and paid the driver the promised handsome fare, the luggage, very modest for a bride, had been taken in, and the viscount followed the maid into the room where the couple had been staying.

"Listen, my lord. He'll get away, he's got the right of it. You'll be guided by me, we'll get on his track in no time." "Roderick became so hot that he lost his breath, because he trusted to that of the detective, Lord Eastling listened, as he was asked to do. After all, Redding was his only friend; without him the pair would have been forced to stay at their own, and the whole terrible story of Paul Payne's antecedents would have been unknown to any member of the family.

He had done. No longer was it possible to have any doubts about the guilt of his newly made brother-in-law, for did not his disappearance hint?

"We'll get him, my lord. He's stammered.

He was amenable to influence at last, and Redding took him by the arm, led him out of the crowd, and opening the door of a taxicab, invited the viscount to go in.

Lord Eastling drew back, started. But a nod and an expressive look from the detective half-reassured him, and he got into the vehicle obediently.

Then Redding got in beside him, gave him an expressive wink in answer to his astonished protest, and said:

"We must let them think we've given up the chase." "What?" stammered the bewildered Eastling.

"'Tchouk' said me, and he saw me speak to you, and I expect he made up his mind to go by the next train. He must leave England, that's certain. He won't want a scandal till he's made himself safe."

"A scandal!" faltered the young man.

"Yes. There would have been a scandal if it had met him in the train and tried to drag him out or anything of that sort. Now he can't afford that, nor can we. For, after all, he may be really your brother-in-law by this time, you know."

This most distasteful thought was indeed ever present to the viscount.

"That won't do much good," he said, "especially for Lady Ursula certainly would acknowledge a criminal as her husband."

"You mustn't reckon on anything where a lady is concerned," said the officer.

"But where are we driving to?"

"We know they're not gone by the time we get to Dover. They'll be at the three-fifteen, get to Dover at eight minutes past five, stops at Priory Station. It's very likely to go by that, and to wait in the town for the train. You may be right, but that's the one you must get by, in the hope of catching them either on the way or at Paris. I suppose they stop the night there?"

"Yes," said Lord Eastling with a frown.

"Good. You may rely upon me to keep watch on this side, but it will be for you to deal with him, my lord, for I'll be at the station to meet him before twelve hours are up."

He spoke with so much confidence that the young man felt a slight increase of it on his side.

"You have found out something," he said.

"Not much, but—well, yes, something. I had a few words with one of our men, and I'm not to tell you what he said, and I found out that he had missed him that time."

"Why didn't you tell me?" raged the young man. "I'm not to tell you what my sister is concerned. I have to act at once."

(To be Continued)

Under a House Shelled With Shrapnel

The following letter has been received in Dublin from a driver in the R.F.A.:

"I have received your welcome letter and P.O.'s. I am going on well. I am in a very dangerous position at present, in fact, I'm in the most dangerous position in the field. I have been shelled all day, and in an

certain ruined house which the Germans wanted. They started throwing shells all day at us; they threw three shells at us, and we waited for what was almost certain death. At last a shell burst, and broke in the front wall of the house. I was then in a dugout inside of it, and was done. It was the liveliest hour I ever had. When we came out after the bombardment the place all round was covered with bricks, mortar, and stones. There was a hole in the roof, and a paradise for a Jerry boulder, plenty of old brick ready to cart away."

Market Flour in China

Milling interests in Canada are increasing, and the market in the Orient, which point to the fact that the Chinese people are changing over from the use of rice as an almost exclusive diet, and are now becoming a large market for the products of flour mills. Mills are being erected in the provinces of Manchuria and Shanghai and other points in central China, and this is pointed to as ample proof of the fact that he was going on to Paris, leaving it to understand that he had travelled with his sister, and her husband.

As he sat back in his corner, he thought over all the events of the day, and pondered upon the situation. Especially did he wonder anxiously as to the success of Redding's efforts to get hold of the jeweller, which Paul Payne had given to Lady Ursula as a wedding present. The detective would know why he had so particularly to see to this, but now that Eastling's eyes had opened to the character of Paul Payne, it was not difficult

to imagine the most sinister reasons for the officer's curiosity.

The viscount kept a sharp lookout at Dover, at the hotel where he stayed so many hours, on his way to the boat, and again on the opposite shore, from the time he got into the boat, and now long since dark, his opportunities as an amateur detective were but small; and although he felt more anxious than ever, he was not entirely without hope, that the fugitives might be on the train after all.

At Paris, in the darkness of the early hours of a cold December morning, as he stumbled out of his compartment, he was met by a man who said that he was almost without hope, as the result of a journey which began to appear to him in the light of a wild goose chase.

Then suddenly, most unexpectedly, through the flutter of a long, heavy black cloak on a tall, erect female figure, he breathed a sigh of relief which was almost a groan.

It was his sister, Lady Ursula.

Long before he could come up with her, she had got into a closed cab, and Paul Payne had shut himself in with her.

Lord Eastling, now completely reassured, chartered a second cab, and, alighting a good distance from the first, he followed his sister into the cab. The driver, promised him a second if he kept in sight of his destination the faerie in front.

The first cab stopped at a quiet hotel, the choice of which proved that Paul Payne knew his Paris, and avoided the haunts of the casual tourist, both English and American.

By the time the cab had got out and paid the driver the promised handsome fare, the luggage, very modest for a bride, had been taken in, and the viscount followed the maid into the room where the couple had been staying.

"Listen, my lord. He'll get away, he's got the right of it. You'll be guided by me, we'll get on his track in no time." "Roderick became so hot that he lost his breath, because he trusted to that of the detective, Lord Eastling listened, as he was asked to do. After all, Redding was his only friend; without him the pair would have been forced to stay at their own, and the whole terrible story of Paul Payne's antecedents would have been unknown to any member of the family.

He had done. No longer was it possible to have any doubts about the guilt of his newly made brother-in-law, for did not his disappearance hint?

"We'll get him, my lord. He's stammered.

He was amenable to influence at last, and Redding took him by the arm, led him out of the crowd, and opening the door of a taxicab, invited the viscount to go in.

Lord Eastling drew back, started. But a nod and an expressive look from the detective half-reassured him, and he got into the vehicle obediently.

Then Redding got in beside him, gave him an expressive wink in answer to his astonished protest, and said:

"We must let them think we've given up the chase." "What?" stammered the bewildered Eastling.

"'Tchouk' said me, and he saw me speak to you, and I expect he made up his mind to go by the next train. He must leave England, that's certain. He won't want a scandal till he's made himself safe."

"A scandal!" faltered the young man.

"Yes. There would have been a scandal if it had met him in the train and tried to drag him out or anything of that sort. Now he can't afford that, nor can we. For, after all, he may be really your brother-in-law by this time, you know."

This most distasteful thought was indeed ever present to the viscount.

"That won't do much good," he said, "especially for Lady Ursula certainly would acknowledge a criminal as her husband."

"You mustn't reckon on anything where a lady is concerned," said the officer.

"But where are we driving to?"

"We know they're not gone by the time we get to Dover. They'll be at the three-fifteen, get to Dover at eight minutes past five, stops at Priory Station. It's very likely to go by that, and to wait in the town for the train. You may be right, but that's the one you must get by, in the hope of catching them either on the way or at Paris. I suppose they stop the night there?"

"Yes," said Lord Eastling with a frown.

"Good. You may rely upon me to keep watch on this side, but it will be for you to deal with him, my lord, for I'll be at the station to meet him before twelve hours are up."

He spoke with so much confidence that the young man felt a slight increase of it on his side.

"You have found out something," he said.

"Not much, but—well, yes, something. I had a few words with one of our men, and I'm not to tell you what he said, and I found out that he had missed him that time."

"Why didn't you tell me?" raged the young man. "I'm not to tell you what my sister is concerned. I have to act at once."

RED ROSE TEA "is good tea"

Germination Test

Testing Seed to Secure Plants With Strongest Vitality

The grain after being moistened just not to allow it to become dry, and not too moist to become fresh. After about six days the sprouts from the seeds of strongest vitality will be sufficiently developed. Seeds which are not unusually long time to sprout germinate about seven days. The seed does not produce a large percentage of strong sprouts, it may be safely used for sowing. It is only necessary to sow such an amount of seed as will be required to fill the seed bed, and the farmer should secure the strongest vitality.

One of the chief sources of strength in big plants lies in the miles and miles of steel ribbon with which the tubes are reinforced. This ribbon is made of iron and steel, and about a quarter of an inch thick, and wound around the tube or core of the great cannon. On a 12-inch gun about 130 miles of the ribbon is wound, and weighs 15 tons. The ribbon has a tensile strength of 100 tons per square inch.

From the time the ingots of steel, some of which are nearly 100 tons in weight, are taken from the steel mill, they are sent to the foundry.

After being taken from the foundry, the miles of steel are dealt with by the machine shop, where a hole is made in each ingot which is known as a "billet hole" machine. Under hydraulic press of 10,000 tons power, it is next forced to reduce it to a tube or jacket of the required length and diameter, and when it has passed through the various annealing and drawing processes, to make it

the strongest and most durable mass, to when it is sown should be treated.

Instead the seed on a clean floor or over in a thin layer, then pour on two ounces of formalin to each five gallons of water. Get a knapsack spray, fill it with the solution and spray the seed with it. Apply a little soap to the seed as a preservative, and then firmly stir the flat to have all the seeds covered with the solution. Keep on moving the seed about until dry enough to be sown. Too much moisture will spoil the seed.

Lord the flat is then sown should be treated.

Editor and Proprietor**Much Grain Stored**

"Going into nearly any of the towns along the Goose Lake line from Calgary a traveller would think he was going into a new western shack town," said a grain man who has just been out over that portion of the C. N. R.

The newly built structures are found to be granaries which the farmers in all parts of the tributary territory have built in town to store their grain.

In Chinook which is a typical farming town in that part of the country there have been between 100 and 200 of these small granaries built during the past winter. These farmers have hauled their grain, in some cases, as much as much as 70 miles. Being unable to get storage in the elevators or the car in which to make shipments, they have put up these little granaries and left an order with someone in the town to sell it for them at the first opportunity."

There is very little hauling being done just now, as the farmers are all busy seeding and it is expected there will be a large number of cars available from now on, and that the grain will be moved in time to make room for next season's grain.

R. M. of Sounding Creek, No. 273**WANTED**

DENTISTRY

DR. PIPER will be in Chinook in May, from the 16th to the 19th, inclusive.

Cannot Let Up**GERMANY MUST GO ON**

The truth is that Germany cannot let up. To do so would be to permit either England or Russia to take the offensive. What Germany dreads, the one thing that would precipitate the inevitable end, is the admission of the war into German territory. When the point of invasion comes, or even when in any respect the Allies are permitted to take the initiative, the end will be near. For that would be the collapse of the pretence, still maintained at home, that Germany has been at every point victorious so far in this war.

German resource is impossible to compute. The siege of Verdun has drawn on it fearfully. But the mere mention of 400,000 men, more or less still available for the aggressive is sufficient indication that so long as Germany can keep her foes on the defensive the end of the war is not in sight.
